

Md Rakib Hasan
Research and Development
Executive
Akij Food and Beverage Ltd.

About Me

I am a dedicated and results-driven R&D expertise with over 2 years of experience in food product development, process optimization, quality control, and assurance within the FMCG industry. My expertise spans across various segments, including beverages, dairy, bakery, confectionery, snacks, and culinary products. My interpersonal communication and human skill, as well as my capability to work in a challenging and goal-oriented environment through enthusiasm, hard work, ethics, sincerity, brilliance and dignity of honesty. Moreover, serve for the humanity

Professional Experience

- **Product Development:** Formulated innovative, cost-effective beverages and dairy products, sourcing alternative raw materials.
- **Research and Trials:** Conducted R&D trials, standardized processes, and prepared BOMs and production instructions.
- **Operational Efficiency:** Developed SOPs, ensured GLP/GMP compliance, and optimized lab and production workflows.
- **Quality Assurance:** Managed shelf-life studies, packaging, and quality standards with routine product analyses.
- **Documentation:** Maintained comprehensive records, including specifications, MSDS, and nutrition declarations.
- **Leadership:** Led plant trials, sensory evaluations, and supplier collaborations for product optimization.
- **Team Development:** Fostered innovation and efficiency through leadership, training, and team collaboration.

Education

Masters

Hajee Mohammad Danesh
Science and Technology
University

Food Engineering & Technology

Cgpa 3.50 out of 4.00

Bachelor

Hajee Mohammad Danesh
Science and Technology
University.

Food and Process Engineering

Cgpa 3.15 out of 4.00

Higher secondary

Dlnajpur Goverment College

Science

Gpa 5.00 out of 5.00

Work Highlights

Electrolyte Drinks

Malt Beverage

Carbonated Beverage

I have played a pivotal role in driving product development and innovation, contributing significantly to revenue growth through:

- Introduction of new products
- Cost-saving measures
- Quality enhancements of existing products

New Product Launches (Fiscal Year 2023–2024):

- Speed Variants: Ginger, Green Apple
- Malt Variants: Apple, Strawberry
- Electrolytes: Lemon, Orange, Litchi, Mango
- Snacks: Dal Vaja, Motor Vaja

These launches were well-received by consumers, reflecting the team's commitment to delivering high taste and quality standards.

Cost-Saving Initiatives:

- Optimized production for Frutika Mango PET & SIG Pack, Frutika Red Grape, and Powder Milk
- Achieved total savings of approximately 7.3 crore taka

Proposal on Development of Functional Food

Through innovation, my aim is to explore the potential of functional foods to provide health solutions that may reduce the traditional medicines dependency, and that could revolutionize global healthcare while prioritizing sustainability and wellness.

Lab Work

- Kjeldahl system
- Spectrophotometer
- Viscometer
- Antioxidant
- Rheometer
- Color flex

Conferences

Symposium on Innovations in Food Research for Industrial Application By- CARES & AFOB- University of Dhaka

Rakib Hasan

Achievements

Best Performer :

Recognized for spearheading successful new product launches, including Speed (Ginger, Green Apple), Malt (Apple, Strawberry), Electrolytes (Lemon, Orange, Litchi, Mango), and Snacks (Dal Vaja, Motor Vaja), all highly appreciated by consumers for their taste and quality. Additionally, led cost-saving initiatives, optimizing production for Frutika Mango PET & SIG Pack, Frutika Red Grape, and Powder Milk, achieving savings of approximately 7.3 crore taka

Thesis Research Work

Thesis Title: PREPARATION OF SYNTHETIC AND EXTRACTED GELATIN-CMC BASED PACKAGING FILMS AND EXPERIMENTATION FOR PACKING BAKED PRODUCTS

Synopsis: Biodegradable gelatin-CMC films, including fish scale gelatin, were developed as eco-friendly packaging. They maintained product quality similar to polypropylene while offering sustainability benefits.

Step by step procedures for gelatin-CMC based biodegradable films preparation and experimentation

Photographic view of the produced packaging films

Thesis Research Work

Thesis Title: EFFECT OF TEMPERATURE ON DRYING KINETICS, PHYSICO-CHEMICAL PROPERTIES AND ANTIOXIDANT ACTIVITY OF CABINET DRIED WHOLE JUJUBE

Synopsis: This study examines the impact of drying temperatures (45°C, 55°C, 65°C) on jujubes. Drying at 45°C preserved the highest nutritional quality, antioxidant activity, and color, while higher temperatures accelerated drying but degraded vitamin C.

Figure: Preparation of Dried Jujube Fruit

Thesis Research Work

Thesis Title: Effect of microwave heating on quality attributes of sugarcane juice during refrigerated storage

Synopsis: Microwave heating improved sugarcane juice quality by increasing TSS, reducing sugar, and phenol content while lowering moisture, pH, PPO activity, and microbial load. Optimal treatments (680 W/10 min, 850 W/10 min) preserved nutritional and microbial safety with minimal changes during storage, extending shelf life effectively.

Fig ; Effect of refrigerated storage of the microwave heated sugarcane juice on polyphenol activity

Fig. 1 Effect of microwave power (510W, 680W, 850W) and holding time (5min, 10min, 15min) on reducing sugar

Students' Welfare Secretary
Food Engineers' Association, HSTU

Skill Development Club of HSTU (HSTU, Bangladesh)
Founding Member
With a goal to develop students critical thinking and leadership skill, founded SDCH, which now have more than thousand students working for the betterment of Bangladesh.

Extra Curricular Activities

● Loading...

I enjoy exploring the beauty of Bangladesh with my friends, discovering its diverse landscapes, vibrant cultures, and hidden gems. Traveling allows me to connect with nature, experience local traditions, and create unforgettable memories.
